

heart rhythms

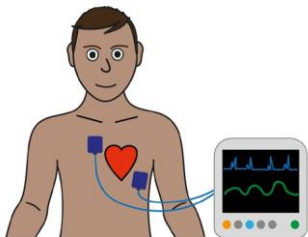

You are coming to have an ECG.

An ECG looks at the electrical signals that make your heart pump. This helps the doctors decide how to look after you.

You will need to take off your top.

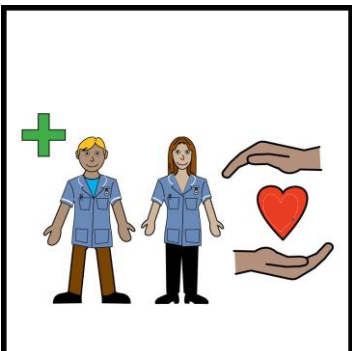

**electrocardiogram
ECG**

We will put some stickers on your chest. We will connect the stickers with wires to the ECG machine.

When the test is finished, we will take off the stickers. You can get dressed again.

If your result shows significant findings, you may be asked to sit and wait up to 1 hour whilst the results are confirmed with the Physiologist.
